1 WELCOME TO VIDEO-ARCHIV 2

With **Video-Archiv**, the follow-up of DVDdb, you can keep your movie collection everywhere you are.

Add movies from different databases to your collection or only scan the barcode a DVD. **Video-Archiv** is a standalone App, but it is a perfect addition to **DVD-Video-Archiv+ v6!** Because of the PC-Synchronization you have the same database in Video-Archiv as on your PC and with the Remote Control you can watch your linked movie files most comfortable on your PC or TV.

After adding a new movie, it will be listed in your archive. Each entry can be marked as “seen”, “wish list” and “it’s mine” and editable by touching. For that, editable boxes or keyboard will open.

Even live editing of “Rating” and “Seen” by Wi-Fi to your PC, if DVD-Video-Archiv+ v6 is running.

Touch the cover to zoom. If you have further high definition pictures saved on PC, they will be available after Synchronization (Inlay, DVD, etc.) and you can watch here all pictures.

2 ADD NEW MOVIE (touch)

2.1 SEARCH A MOVIE (USE KEYBOARD)

Use the keyboard to enter your search item. Choose a country source and whether you want to search for title, director or actor.

If you have selected EAN, enter only the EAN-number of a DVD or Blu-ray as search item.

Start searching with <Return> on the keyboard or touch the magnifier.

The search for movies in the Internet begins. This may take a few moments depending on your Internet connection.

The search result is shown as a list with the most important information (small cover picture, title, land, year, director and actor).

If you touch one entry, you will see all information in detail.

To add exactly this movie to your collection, touch <Add to Archive>.

The movie will be added to your collection and you will see the list of the previous search result.

2.2 SCAN BARCODE

(touch – only portrait orientation)

Only if you keep your device in portrait orientation, you can scan the barcode of a DVD / Blu-ray instead of using the keyboard.

Keep the camera still. The barcode will be detected and scanned automatically in a distance of 3-5 inches. All information of this movie will be loaded from the Internet.

As before, the search result is shown as a list. After touching a movie you will see all details and you can add this movie to your collection by touching <Add to Archive> or turn back to the search results.

3 MOVIE COLLECTION

3.1 LIST AND DETAILS

After starting Video-Archiv you get a list of your entire collection.

Touch an entry to get all detailed information of this movie.

3.2 ZOOM COVER

For zoom a cover picture, only touch it!

If you have DVD-Video-Archiv+ v6 installed on your PC and synchronized with Video-Archiv, you can also watch further pictures like Inlet, Inlay and DVD.

3.3 SEARCH MOVIE IN ARCHIVE

Slide down the movie list and you can search for a movie titles within you entire collection.

You can change the search options in the setting to search in other fields. This may reduce speed of search significantly.

4 EDIT ONE MOVIE

All information of a movie is editable. Touch the corresponding text or symbol and you can make changes by the keyboard or select other proposals from lists.

free text field
 Icon editable
 Choose from list
 Slider
 Pick the date

- Country/Year:
- Runtime:
- FSK (age):
- Movie no:
- Rating:
- Seen:
- My location:
- Director:
- Production:
- Actors:
- Storyline:
- Languages:
- Aspect Ratio:
- (up to 3) Genre:
- EAN:
- Sub title:
- Theatre:
- Release:
- Media type:
- Region code:
- On my wish list:
- Acquired property:

5 SEARCH TRAILER

In the movie details you can start searching for Trailer. For that, touch the corresponding icon and the search will start.

If a Trailer is found which is compatible to your device, it starts playing immediately.

6 COVER FLOW

(only iPhone)

If you see your movies as a list and you turn your iPhone into landscape orientation, you will get the Cover Flow.

Cover Flow only exists on iPhone.

Swipe: move through your movies
Double-tap: open a movie

7 NEW RELEASES / PUBLICATIONS

(touch)

7.1 SEARCH

Touch the symbol to search for New Releases.

The last 100 new publications are shown as a list with the most important information (small cover picture, title, land, year, director and actor).

If you touch one entry, you will see all information in detail.

7.2 ADD A NEW RELEASE

To add exactly this movie to your collection, touch <Add to Archive>.

The movie will be added to your collection and you will see the list of the previous search result.

8 CATEGORY, GENRE AND FILTER

or

or

(touch)

In Video-Archiv you cannot edit Categories. This only happens during the PC-Synchronization with DVD-Video-Archiv+ v6.

After Synchronization you have the same Categories in Video-Archiv as on your PC.

8.1 CATEGORY

Touch the Category-icon to select from the list <Category, Genre and Filter> a Category or Subcategory to list all corresponding movies.

Confirm your choice by touching the green hook!

Touch a category to open it. The Category may contain other Subcategories and/or movies.

You will see this icon in the toolbar after selecting a Category.

To change to the parent category, touch this icon at the top of the list of categories.

8.2 GENRE

Touch the icon for Category, Genre or Filter in the toolbar and select from the list a Genre to list all corresponding movies.

Confirm your choice by touching the green hook!

All movies with this Genre will be listed.

You will see this icon in the toolbar after selecting a Genre.

8.3 FILTER

Touch the icon for Category, Genre or Filter in the toolbar and select from the list a Filter to list all corresponding movies.

Confirm your choice by touching the green hook!

All movies with this Filter will be listed.

You will see this icon in the toolbar after selecting a Filter.

9 PC-SYNCHRONIZATION (ONLY WI-FI)

(touch)

The IP-address of your device is displayed for your information and the date of last PC-Synchronization. You don't need to open this view for Synchronization, only run the App.

In the settings you have to enter the IP-address of the PC where DVD-Video-Archiv+ v6 is running.

Start the Synchronization on your PC in DVD-Video-Archiv+ v6 and select the device which is ready for Synchronization in your Wi-Fi. Don't quit the App until the Synchronization is finished.

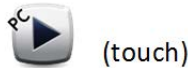

After Synchronization you can playback the movie files on your PC or TV and watch additional pictures like Inlet, Inlay and DVD in Video-Archiv.

You will see this additional icon within the cover picture in the list view, if an entry is linked to a movie file.

10 PLAYBACK A MOVIE FILE

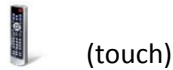

10.1 PLAYBACK MOVIE

Touch this icon to start this movie immediately on your PC or TV.

Then the Remote Control starts automatically.

10.2 REMOTE CONTROL

The Remote Control contains these additional features:

- Entire and current runtime,
- Basic volume,
- Rotation lock.

If you hold your device in landscape orientation, you can navigate in DVD-Video-Archiv+ v6 with the arrows through all your entries.

Touch (i) on the Remote Control to get the on screen menu of the Remote Control on your TV or screen.

11 SETTINGS

(touch)

Following settings are available:

- Language: German / English,
- List view: Show rating, highlight unseen movies, cover flow in landscape (only iPhone),
- Sort Sequence: by Title, No., Director and ascending/descending Sort Order,
- PC Wi-Fi Remote Control: IP-address of PC,
- Search option,
- Multitasking.

For the background of Video-Archiv you can choose one of these themes:

- Dark blue,
- White,
- Carbon,
- Parquet,
- Fire,
- Water,
- Carrera.

To confirm your choice quit the settings, touch the green hook!

12 QUIT

(touch)

Touch this icon to shut down Video-Archiv. The App will not stay in the background.

You can also use the home button for shut down. For that, you have to change the settings of Multitasking. Otherwise, touching the home button will only minimize Video-Archiv and keep running in the background. This is just the same behavior as in other Apps.

13 ADDITIONAL ICONS

Information about the Version of Video-Archiv and GBelectronics and show the help-page within Video-Archiv.

If you see this additional icon, the corresponding function is temporary not available because of missing Wi-Fi or Internet connection.

14 INTERNET- / WI-FI-CONNECTION

14.1 INTERNET IS REQUIRED FOR...

- ... Add new movie,
- ... New Releases / Publications,
- ...Search for Trailer.
